TITLE

Results Monitoring Survey 2023

COUNTRY

Name	Country code
Myanmar	MMR

STUDY TYPE

Socio-Economic/Monitoring Survey [hh/sems]

ABSTRACT

The UNHCR Results Monitoring Survey (RMS) is a household-level survey covering people who are directly or indirectly assisted by UNHCR. In Myanmar, respondents included internally displaced persons, returnees, stateless and host community. The objective of the survey is to monitor impact and outcome level indicators on education, healthcare, livelihoods, protection concerns, shelter, and water and sanitation. The results contribute to an evidence base for reporting against UNHCR’s multi-year strategies to key stakeholders.

The RMS can be implemented in any operational context. A standard structured questionnaire has been developed for the RMS, which can be conducted as a stand-alone survey or flexibly integrated with other data collection exercises. The questionnaire was adapted to the Myanmar context and programme objectives by including, e.g. the IDP module. Questions related to Accountability to Affected Populations (AAP) and service provision were added. A mixed methodology of remote and in-person interview was applied to allow for inclusion of respondents in areas not accessible to data collectors, e.g. rakhine state. The data includes indicators collected at both the household and individual (household-member) level. The survey covered 4444 household amounting to 19009 individuals.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Households

Version

VERSION DESCRIPTION

v2.1: Edited, cleaned and anonymised data

VERSION DATE

2024-03-29

Scope

NOTES

The standard RMS questionnaire was adapted to the Myanmar context and covers:

1. Household roster and mobility history
2. IDP and Returnee identification
3. Vaccines, disability and health service access
4. Housing, energy and WASH facilities
6. Social protection, assistance and childcare.
7. Employment and financial inclusion
8. AAP
