TITLE
Results Monitoring Survey and Socio-Sconomic Assessment 2023

COUNTRY

Name	Country code
Nepal	NPL

STUDY TYPE
Socio-Economic/Monitoring Survey [hh/sems]

ABSTRACT
The UNHCR Results Monitoring Survey (RMS) is a household-level survey covering people who are directly or indirectly assisted by UNHCR. In Nepal the survey covered refugees and Asylum Seekers. The objective of the survey is to monitor impact and outcome level indicators on education, healthcare, livelihoods, protection concerns, shelter and social protection. The results contribute to an evidence base for reporting against UNHCR's multi-year strategies to key stakeholders.

The RMS can be implemented in any operational context. A standard structured questionnaire has been developed for the RMS, which can be conducted as a stand-alone survey or flexibly integrated with other data collection exercises. The questionnaire was adapted to the Nepali context and programme objectives by removing, e.g. questions related to camp settings. Additionally, an extended module socio-economic markers was included. The data includes indicators collected at both the household and individual (household-member) level. The survey covered 361 household amounting to 1292 individuals.

KIND OF DATA
Sample survey data [ssd]

UNIT OF ANALYSIS
Households and Individuals

Version

VERSION DESCRIPTION
v2.1: Edited, cleaned and anonymised data

VERSION DATE
2024-03-29

Scope

NOTES
UNHCR Nepal adjusted the standard questionnaire for the Results Monitoring Surveys (RMS) to integrate with the Socio - Economic assessment data collection. The survey covers:
1. Household composition and documentation
2. Access to healthcare and vaccinations
3. Education
4. Income-generation, access to employment and financial coping strategies
5. Perceptions of genderbased violence
